MANUSCRIPT REPORT NUMBER 46

EXCAVATIONS AT CASTLE HILL

by

Roger T. Grange, Jr.

VOLUME 2

September 1971

NATIONAL AND HISTORIC PARKS BRANCH

DEPARTMENT OF INDIAN AFFAIRS AND NORTHERN DEVELOPMENT

Provenience: 2A10F3

Thickness: 6.0 mm.

Bead (Plastic)

An opaque, round, dark green glass bead was recovered from the basal rubble fill of the ditch, a probably French context (Fig. 110i). It has a central hole for stringing. It is probably a type IIa drawn bead of dark palm green colour (Kidd 1970: IIa28 Colour Plate ii, Table 2). It is of large size.

Provenience: 2A6D4

Diameter: 8.0 mm.

Hole diameter: 1.5 mm.
